Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The identities of the "hydrogenated aliphatic resin" are not shown by the Specification. The term is not specific as to any particular compounds nor any other factors which would enable one having an ordinary skill in the art to know what may be embraced by this recitation for use in the invention. The term is not art-recognized for any particular class or grouping of compounds, nor is it a proper Markush group to which members are known or easily ascribed. The determination of what may be usable in this capacity would require the undue burden of experimentation on the part of the artisan.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-72 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term is not clear as to its proper metes and bounds, and, as such, is deemed to be vague and confusing.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-72 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Klosiewicz ('446), newly cited.

The reference teaches the instantly claimed invention at the Abstract, column 2 (lines 28 et seq.), column 8 (line 10) to column 9 (line 55), the Examples and the claims.

Claims 1-72 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Klosiewicz ('496), newly cited.

The reference teaches the instantly claimed invention at the Abstract, column 2 (lines 42-54), column 3 (line 51) to column 4 (line 16), the Examples and the claims.

Art Unit: 1711

The reference to Itaba et al, cited of interest, teaches the inclusion of an hydrogenated resin to a low density polyethylene. However, the inclusion at 10 to 50 weight percent is higher than contemplated herein. Note the Abstract and the Examples.
